

DANIEL TU

Syracuse, NY | tudan58@gmail.com | github.com/dguyentu | linkedin.com/in/daniel-tu

PROFESSIONAL SUMMARY

Software Engineer specializing in building enterprise-scale digital experiences and leading digital transformations. Expert in full-stack architecture, FinTech integrations, and MarTech data orchestration.

PROFESSIONAL EXPERIENCE

Lead Engineer | Vector Security

July 2023 – Present

Warrendale, PA (Remote)

vectorsecurity.com

- **Digital Transformation:** Architecting a modular React.js CMS block architecture to replace legacy in-house infrastructure, improving systemic performance and scalability.
- **Lead Developer:** Directing UI/UX strategy for 12+ Optimizely CMS instances; modernized a legacy MUI React library for rapid enterprise-wide feature deployment.
- **FinTech & Payments:** Engineered a secure billing portal integrating Sensepass (Omnichannel SDK/API), Autopay middleware, and Retail Realm for multi-channel transactions.
- **Infrastructure:** Debugging Docker/Kubernetes clusters and collaborating on Azure Service Bus architectures to ensure high availability for 400k+ subscribers.
- **Governance:** Leading technical refinement meetings and serving as a Required PR Approver to maintain high code standards and security protocols (Okta/SSO).

Frontend Developer | Raymour & Flanigan

June 2021 – July 2023

Syracuse, NY

raymourflanigan.com

- Migrated legacy infrastructure to a modular React.js system, streamlining cross-departmental operations for Marketing, Finance, and E-commerce.
- Partnered with global agencies (Meta, Snapchat, Wunderkind) to implement GTM and Conversions API solutions, optimizing data attribution across web and email ecosystems.
- Developed a robust HTML5/CSS3 template library for the CRM team, significantly reducing production lead times for responsive communications.

UI Engineer | Zones LLC

Dec 2020 – July 2021

New York, NY (Remote)

zones.com

- Engineered accessible, high-traffic Ember.js/SCSS applications for UAlbany.
- Architected a secure Drupal CMS payment portal leveraging internal and third-party API integrations.
- Implemented LinkedIn Insight, FB Pixel, and Google Analytics architectures for deep client-side data visibility.

Mobile Applications Developer | Albany Medical Center

May 2018 – Nov 2020

Albany, NY

amc.edu

- Optimized the "Albany Med Routefinder" Android web app using ES6, Backbone.js, and Marionette.
- Implemented scalable AWS solutions and optimized Google Maps API logic for high-frequency routing.

FEATURED PROJECTS

Vector Security Platform Consolidation: Consolidated legacy ADS Security assets into a unified React platform for 400k+ subscribers.

R&F Commercial Portal: Full-stack B2B lead-gen and payment ecosystem using Node.js, .NET, and Snowflake DB.
